### Revised PTOL-85 Issue Fee Transmittal Form

The purpose of this notice is to advise the public that form PTOL-85 has been substantially revised so as to be more effective and easier to use. Form PTOL-85 starts out as a three page form. Page 1 is form PTOL-85B, the *Issue Fee Transmittal* form. This form is labeled "TRANSMIT THIS FORM WITH FEE" in red at the bottom. Form PTOL-85B is used for submitting the issue fee. The PALM data that is printed on this form will be much clearer than before as it is now the first (or top) printed copy. This should ensure that the submitted issue fee is promptly credited to the correct application file.

Pages 2 and 3 of PTOL-85 are, respectively, the applicant's copy and the PTO's copy of PTOL-85, the *Notice of Allowance and Issue Fee Due* form. The applicant's copy is labeled "YOUR COPY" in red at the bottom. The applicant should retain the applicant's copy of form PTOL-85.

Form PTOL-85B (*i.e.*, page 1) has also been revised to have the Certificate of Mailing in the upper right corner and to clarify that the Certificate of Mailing is to be used for domestic mailings only. Additionally, the CURRENT CORRESPONDENCE ADDRESS block shall permit write-in corrections for making minor changes in the correspondence address. Alternatively, a change in the correspondence address, or an indication of a "Fee Address" for maintenance fee notifications, may be made by checking the appropriate set of brackets in Block 1 and including the appropriate attachment.

Block 3 of the revised form PTOL-85B will be used to indicate assignee data to be printed on the patent, as well as the status of the assignee as: (1) individual, (2) corporation or other private group entity, or (3) government entity. Applicants are being asked to indicate the status of the assignee in order to increase the accuracy of the assignee category codes being entered by the Office into the Patent Full Text Data Base, which can later be extracted and used for statistical purposes. This has become necessary since the assignee's category is not always evident at the point in the publication process when the assignment data is being captured from the PTOL-85B form.

The applicant is requested to transmit an extra copy of PTOL-85B when payment of the issue fee is by way of authorization to debit a Deposit Account.

**Reference Collections of U.S. Patents and Trademarks**
**Available for Public Use in Patent and Trademark Depository Libraries**

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

# MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
